

LAMIREL PCB Europe s.r.o. deals with the deliveries of unassembled printed circuits boards, completion of components, their assembling, soldering and testing. The company is among the prosperous market players in which there is a growing need to manage the development of the internal structure in order to provide an efficient quality management system, thereby creating the prerequisites for better meeting the needs and expectations of our customers in providing our services for the area of deliveries, assembling and soldering of printed circuits boards.

This quality policy responds to current and future needs and expectations of customers and stakeholders in business areas. The long-term target is to provide high-quality products of printed circuit boards to its customers with regard to the internal context of the organization (functioning of the internal order management processes, qualified personnel, continuing vocational training) and to the external context (compliance with legislative standards, maintaining good relationship with existing customers, to maintain mutual cooperation with external providers).

Maintaining a well-established quality management system according to the ČSN EN ISO 9001: 2016 standard is a means to meet the company's goals. That is why the company strives to fulfill the commitments, which it set from the individual areas:

- The company's main principles are responsibility, reliability, mutual trust, quality of deliveries and proposed solutions
- Long-term and systematic quality care to keep the system constantly improving, ensuring functionality and efficiency.
- Ensure adequate resources (human, process environments, infrastructure) for the quality system and create conditions to support and implement this policy.
- Comply with all applicable legislation and other mandatory requirements.
- Training to increase the skills of workers.
- Attainment of the minimum level of dissensions and complaints.

Scope of certification applies to the area of quality management system:

Electronic manufacturing services, deliveries and assembling of printed circuit boards.

Locations where the quality management system is applied:

Jungmannova 1132, Valdické Předměstí, 506 01 Jičín: office, warehouse
